

Corrigendum to Request for Proposal for development of a web-based application for a SDM System – January 14, 2011

Dear All,

Subsequent, to the pre-bid meeting for the Request For Proposal for development of a web-based application for a Skill Development Management System held at the NSDC office on January 7, 2011, please find below clarifications to the following salient points:

1. Projection on number of centres to be setup by March 2012. – **Approximately, 2250 centres by March 2012**
2. No. of Partners/ Training Providers: **NSDC has approved 25 Training Providers till date who have a projection to train 40m people by 2022. Every month, NSDC shall approve at least 4-6 Training Providers, till the estimated training plan reaches the number of 200 million. NSDC may have 300+ Partners approximately.**
3. Projection on average number of students per centre - **It varies, based on the number of courses being conducted, location of centres, etc. On an average, each batch would have 5 to 50 trainees. Duration of training may vary from one day to 9 months.**
4. How much time should the student data be retained in the system? **Each Student becomes a probable candidate for next level of certification. Also, we need to track the mobility of all the students being trained life-long. Hence, we need to have some traceability data of each trained person. However, the detailed data of each can be archived, after say 12 months of employment or as deemed suitable, and may vary from Partner to Partner. These data would also be required for analytical works. One needs to understand how Facebook or Google manages their data base.**
5. Locations where the System requirement Study will be done – **With various Partners of NSDC, located at Delhi, Mumbai, Kolkata, Ahmedabad, Bangalore, Hyderabad, Gurgaon, Chennai, Centre visits may also be required. It's only an indicative list.**

The above response is only indicative for your basic understanding and not binding on NSDC anyways whatsoever. The figures may change significantly.

Thanks & Regards,

Jaikant Singh
